

## TV and Camcorder setup

### 1. Turning on TV

- Make sure power strip on - switch at one end
- Switch TV on – Large remote green button top right
- Select input – top left input button
- Continue pressing input button until correct input selected.
- Wait 3- 5 seconds for it to switch

### 2. Camcorder

- Plug HDMI into HDMI 2 slot on TV
- Make sure TV is set to HDMI 2 using TV remote input button (See instructions above)
- Open flip screen and plug in micro HDMI into camcorder
- Plug power cord into power strip
- Turn on by opening flip screen on camcorder
- Touch menu button on camcorder screen
- Touch movie – brings up standby screen for live streaming to TV
- To record, touch red button on camcorder screen
- To stop recording touch red button on screen again
- To zoom out, touch W button on camcorder screen or use silver button on top of camcorder.
- To zoom in, touch T button on camcorder screen or use silver button on top of camcorder.
- Camcorder records to SD Card which is adjacent to flip screen, be sure to transfer your recording to your own device before you leave. Please ensure SD card is back in camcorder before you leave.

### 3. PC HDMI connection

- You may use your own laptop, it has to have an HDMI slot on the laptop
- Plug in and turn on computer
- Plug end of large HDMI cable into laptop
- Plug other end into HDMI 4
- Select input on TV remote to HDMI 4, wait 3 seconds  
Your screen should now be visible on the TV

### 4. AAG IPAD

- Hit home button and enter pass code 1234
- Select HDMI 3 using TV remote and wait 3 seconds. This brings up the apple TV. If no signal, check apple TV power connection
- On IPad swipe up from bottom twice to see screen mirroring button, select apple TV. You should then see the screen on the TV.
- Select the window with your presentation

- Best to have everything downloaded to your device to avoid a spotty internet connection

#### 5. Personal iPad

- Open iPad and connect to AAG Wi-Fi
- Swipe up from bottom to see screen mirroring button, select Apple TV
- Select HDMI 3 using TV remote and wait 3 seconds. This brings up the apple TV. If no signal, check apple TV power connection
- TV will display code which you must enter in your iPad when prompted.
- You should then see your screen on the TV
- Select your presentation.
